Summary

Web Developer focused on front end development and responsive web design. Production experience in JavaScript, JQuery, SCSS, CSS, HTML5, Ruby, Heroku, and PHP. Strong interest and some experience in Front end frameworks including React and Angular.

Experience in Agile, Kanban, pair programming, Test Driven Development, and Behavior Driven Development. Briefly worked as a Scrum manager.

I am a broadly experienced developer eager to continue to delivering ambitious web solutions using new and exciting technologies.
